Course Rationale

In 2009, Missouri Senate Bill 291 established the “School Flex Program” as an incentive for students to stay in school part-time while continuing to work towards a diploma. Students who hold a senior standing can benefit substantially from a school-directed and supervised paid learning experience that cannot be readily provided within a regular classroom setting – experiences that can be made available through assignment to off-campus locations under cooperative arrangements with business and industry or other institutions.

Course Description

Cooperative Career Education is a career and technical education program based on the cooperative education method of instruction. The program should serve students with a wide variety of career interests, including careers not traditionally considered “vocational”. Academic study is combined with paid supervised employment in a career area of interest. The employment is planned and supervised by the school in cooperation with a business or industry. A formalized agreement between all cooperating parties specifies the role each is to play as part of the program. A written plan of instruction details the knowledge and skills to be mastered. The teacher-coordinator responsible for the program conducts periodic communication with the student’s employer in order to better correlate classroom instruction with employment skills, and to complete evaluations of the student’s performance which are supplemented by employer evaluations. Credit is awarded for the classroom instruction and for the on-the-job experience in compliance with Linn County R-1 School District Policies. The program is open to high school seniors as a practical arts elective for one semester during their senior year.

Career Study Program Student Objectives

1. Development of occupational competence.
2. Development of higher level, transferrable knowledge and skills related to careers.
